

Making a Canoe

Materials:

brown construction paper or brown paper bag
 black marker (and optional: colored markers to decorate)
 scissors
 yarn
 hole punch

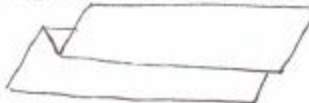

Directions:

1. Fold the construction paper in half along the longer side.

2. About half an inch away from the fold line, fold the paper again.

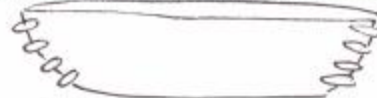

3. Repeat on the other side of the original fold.

4. Draw curves to create a canoe shape and punch holes along each end.

5. Weave yarn through the holes to hold the canoe together.

6. Push the folded floor flat to help the canoe stand up straight.

7. Decorate your canoe with colored markers or paints.
